

## Origami Planter

The Origami Planter was inspired by the processes and materials in which it is made. We used origami as the method in which to explore and create the form. Copper is ideal for the outdoors and will develop a beautiful brown to green patina. Planters are equipped with drainage.

Origin: Made in the USA by skilled craftspeople

Dimensions:

Origami 10: 10"x10"x10"

Origami 14: 14"x14"x14"

Materials:

Copper:

Copper is weatherproof and develops a protective patina, or can be polished to maintain its original shine.

Weathering Steel

Weathering steel (also referred to as Corten steel) is a steel alloy designed to withstand corrosion by developing a protective patina.
