BOOKSCAPES 2018

Bookscapes are functional sculptures born out of a desire to honor and display our books. Mountains and Valley display an open book and Peaks shows off the cover. Mountains and Valley are ideal for your most beautiful books, keep even your largest art books open and slowly turn a page at a time to fully appreciate the visuals. Peaks is a good place for your books that are on deck, books of all sizes can be displayed so that the cover or the spine is facing out.

All three Bookscapes are expertlycrafted. Mountains and Peaks are made from solid spanish cedar that is hand dyed black and sealed with a waxed based finish. Valley introduces stone into the collection. It is made from a solid piece of Vermont green marble.
